Read the following passage and then answer the questions, below.

Many people *wonder*: Why do we sleep? Why do we dream? They ask themselves the purpose, or reason. There are many theories, or opinions about *this* , but scientists don't know if these ideas are correct.

One theory of sleep says that during the day, we need to sleep to make new chemicals and repair, or fix our bodies. This theory is called the " Repair Theory". One piece of *evidence* for this theory is that our bodies produce more of growth hormone while we sleep.

Another theory is that the purpose of sleep is to dream. Dreaming *occurs* only during one stage , or period, of sleep (Rapid Eye movement- REM)sleep. REM sleep occurs about 90 minutes and last for about 20 minutes. Some scientists believe that REM sleep helps us to remember things, but *others* don't believe and don't agree.
