Student safety procedures in the laboratory

For your safety inside the laboratory, you must adhere to the followings:

- 1- Wear a lab coat, safety glasses, and gloves inside the laboratory.
- 2- Identify the locations of first aid tools inside the laboratory
- 3- Smoking, eating, and drinking are prohibited in the laboratory.
- 4- The work in all laboratories must be done according to the specified timetable, and in the presence of the laboratory administrator.
- 5- Materials validity and their precautions must be verified before starting and conducting the experiment.
- 6- Do not taste, smell or contact directly with chemicals.
- 7- Experiments that emit harmful gases must be conducted inside the gas cabinets.
- 8- The test tube nozzle must be kept away from your face and your colleagues when heating.
- 9- Keep flammable solvents away from flames, and ensure closing for more safety.
- 10- The reactions that need heating must be kept under supervision.
- 11- Use pipette filler for filling all liquid volumes and avoid using the mouth.
- 12- When acids contact your skin, you must wash it quickly with a low-concentrated solution's alkaline.
- 13- If you are injured or burned due to flame or chemicals, directly go to the first aid box and call the emergency number below.
- 14- Close and secure water, gas gages and electrical switches when they are not in use.
- 15- Clean the work area and tools used in experiments by using water or appropriate detergents.
- 16- In emergency cases directly request the supervisor assistance.
- 17- Don't roam outside the laboratories or touch computers or personal items while wearing gloves, remove them and wash your hands before leaving the laboratory.

In emergency cases, always remember calling:

Civil Defense (998) Security and Safety (9900) Medical Clinics (7777).
