College of Medicine

Postgraduate Studies and Scientific Research Deanship

Scientific Research Unit

Who are we?

The Scientific Research Unit was established for the purpose of serving scientific research at the College of Medicine and upgrading it to keep pace with both the vision of 2030 and the university's vision, in publishing qualitative and distinguished research that fits the university's prestigious position and its local and international classification.

Vision:

Enhancing research activity at the College of Medicine to be a leader in qualitative medical field research locally, regionally and globally, to enhance the national vision and the position of the Kingdom of Saudi Arabia and King Faisal University.

Mission:

Create a distinctive and supportive research environment for researchers from faculty members and college students for the undergraduate and postgraduate levels.

Aims:

1. Establish a database for published medical research by the faculty and students of the college of medicine.
2. Promote the culture of research collaboration within the college and advocate for the needs of research community.
3. Involve medical students in scientific research activities.
4. Train and improve scholars skills on the best research methods and practices.
5. Document and recognize all research activities within the college.
6. Inspire healthy competitiveness between our faculty in participating and publishing research with high impact in the scientific body of literature.
7. Collaborate with student counsel to create a culture of high achievement.
8. Provide and support a strong infrastructure for research facilitation including a scientific library for all faculty and students as well as access to approved journals in SCOPUS and web of science.

Responsibilities and duties:

1. Arrange for appropriate workshops and lectures in the research field for students and staff.
2. Collaborate with the deanship of scientific research in representing the college of medicine.
3. Create research friendly environment for interested scholars.
4. Organize the semi-quarterly research day in the college.
5. Assess the needs for the research community in our college and evaluate suggested solutions periodically
6. Prepare quarterly updated reports on the scientific work of each department.
7. Invite prominent speakers in the field of medical research to lecture in our college.
8. Collaborate with other colleges in term of scientific research.
9. Continuous monitoring and follow up with scientific goals of the college.
10. Shed light and recognize all medical research by faculty and students.
11. Summarize and translate scientific recommendations to the community to promote evidence based health education.
12. Establish a scientific accomplishment section in the college library for published research.
13. Collaborate with the communication and media unit in recognizing research activities within the college of medicine.
14. Communicate with students for their research activities.
