

Curriculum Vitae

Askar Alshammari

Teaching Assistant of Infectious diseases

Department of Clinical Studies,

College of Veterinary Medicine,

King Faisal University,

Kingdom of Saudi Arabia.

Phone: +966559310504

Email: akalshammari@kfu.edu.sa

Objective

- My main passion is to improve my competencies within the area of infectious disease through studying abroad. That is why I am trying to be enrolled at a matching Master or MPhil/PhD program in a reputable university. In fact, being qualified and optimistic will be reflected positively on my career.

Education

- I have my Bachelor's degree in Veterinary Medicine on June 8, 2015 from the King Faisal University, Al-Ahsaa, Saudi Arabia.
- Selected to participate in investigating the wellbeing of the livestock special

trip to mecca to ensure the meat safety measures.

- Course work included the study of infectious diseases, pathology and preventive medicine.
- GPA: 4.13/5

Relevant Experience

- I have been appointed as a Teaching Assistant of infectious & zoonotic diseases at the College of Veterinary Medicine, King Faisal University on September 28, 2017.
- Providing the students with the relevant knowledge, skills, and attitudes of the infectious & zoonotic diseases.
- Guiding and assisting the students at the Veterinary Teaching Hospital.
- Attending the lectures and practical session related to infectious & zoonotic diseases.
- I have been working for two years at the Fifth Company for feeding stuffs and animal production in the Eastern region of Saudi Arabia while I was responsible for the food additives and medicine as well. In the 2nd year, I was responsible for marketing and sales at the same company. I have crucial skills within the area of food additive inspection, public awareness around diseases and sales.

Laboratory skills

- A real-time polymerase chain reaction (Real-Time PCR).
- Enzyme-linked immunosorbent assay (ELISA).
- DNA and RNA extraction

Various skills

- Head of Student Activities in the College of Veterinary Medicine, King Faisal University in 2014.
- Presenter of celebrations and activities in the College of Veterinary Medicine, King Faisal University from 2013 to 2015.

Volunteer at local farms in Al-ahsa region, where I reinforced my skills through:

- Helping the farmers in diagnosis of animal and poultry diseases.
- Increase the awareness about the preventive measures of diseases.
- Providing the needed assistance during parturition of the farm animals.

Training programs, Workshops

Held on October 14 – 18, 2018

- Training program titled: “Recent Advances in Equine Medicine and Reproduction” organized by King Faisal University.
- **Held on March 13– 14, 2018**
- Training program titled: Scientific Publishing skills with Special Reference to Hijacked Journals.

28 April, 2018

- Participated in world Veterinary Day which was organized by Saudi Veterinary Medical Society in Saudi Arabia.

From March 8, 2015 to April 8, 2015

I have been trained at the United National Dairy Company in Alahsa, Saudi Arabia, where I became able to:

- Diagnose the different cattle diseases.
- Advise the workers on how to treat the different diseases affecting cattle.
- Ensure the biosecurity measures adopted by the workers.
- Monitor the state of hygiene of the Alraian's dairy plant.

From May 10, 2015 to June 10, 2015

I have been trained at the Alwaziyah poultry Company in Alahsa, Saudi Arabia, where I was able to:

- Diagnose the different poultry diseases.
- Advise the workers on how to treat the different diseases affecting poultry.
- Ensure the biosecurity measures adopted by the workers.

Awards and Acknowledgments

- I have been nominated as the best community contributor during my participation in the sixth student conference in Jeddah 2015.
- I have participated in the sixth student conference where I presented my paper about the endometritis in she camels at AL-hasa region.
- I have participated in the fifth student conference where I presented my paper about the mastitis in she camels at AL-hasa region.

Memberships

Member, Saudi Veterinary Medical Society (SVMS).
