WORK EXPERIENCE

I am a Teaching Assistant at King Faisal University with a Master of Science degree in Translation Studies with Distinction from the University of Aberdeen. I have many years of experience as a TA, during which I have taken the complete responsibility of educating and preparing the young generations to be fully qualified and versed in the English language. I have also contributed to King Faisal University with programs and activities aimed at both the students and the faculty, alongside participating in seminars and workshops aimed at enhancing my abilities at my profession in both the teaching and the research field. This, in turn, enhanced and enriched my skills to constantly refine and improve the employed teaching methods to better prepare tomorrow's workforce in alignment with the 21st-century skills and the Saudi Vision 2030.
