### Course Identification

1. Credit hours:	3
2. Course type	
a.	University <input type="checkbox"/> College <input type="checkbox"/> Program <input checked="" type="checkbox"/>
b.	Required <input checked="" type="checkbox"/> Elective <input type="checkbox"/>
3. Level/year at which this course is offered:	Level 6/ Year 2

### 4. Course general Description

Examines the theoretical, conceptual framework, essential concepts, theories, and practices of major topics in operations management field and its main topics such as productivity, operations strategies, product design, linear programming models, demand forecasting, as well as dealing with cases of studies related to operations management functions. Formulating plans and strategies as well as applying the essential operations knowledge and skills in different situations in order to improve managerial skills and the organization's performance. This requirement will improve students' cognitive skill, teamwork and communications besides enhancing their managerial and leadership's competencies.

5. Pre-requirements for this course (if any): Quantitative Methods for Business

6. Co- requirements for this course (if any): None

### 7. Course Main Objective(s)

- To provide the theoretical, conceptual framework and essential knowledge of operations management.
- To equip students with the essential knowledge and skills in operations management field as well as its managerial activities, functions and practices.
- To enable students to behave ethically when practicing operations functions, roles and responsibilities.
- To enable students to assess and evaluate operations decisions as well as duties effectively by using different evaluation tools.

b.	Required <input checked="" type="checkbox"/> Elective <input type="checkbox"/>
3. Level/year at which this course is offered:	Level 6/ Year 2

### 4. Course general Description

amines the essential knowledge of scientific research like research problems, concepts, and practices of research. It focuses on improving student's level of skills of formulating, designing and applying the main research's procedures in business cases, well as dealing with cases of studies related to business management topics. Formulating research problems, research questions, research hypotheses, choosing the methods to select samples, choosing the methods of data collection, etc. This requirement will improve students' research, cognitive skill, teamwork and communications besides enhancing their managerial competencies.

### 5. Pre-requirements for this course (if any):

6. Co- requirements for this course (if any): None

### 7. Course Main Objective(s)

- To provide the theoretical, conceptual framework and essential knowledge of fundamentals of scientific research field.
- To equip students with the essential research methods and skills in scientific research field as well as its practical activities, functions and practices.
- To enable students to assess and evaluate research methods, strategies and tools when introducing methods of working or management's decisions and problems.

## A. General information about the course:

b.	Required <input checked="" type="checkbox"/> Elective <input type="checkbox"/>
3. Level/year at which this course is offered:	Level 10/ Year 4
4. Course general Description This course aligns distribution management with a comprehensive overview of intermodal distribution management and covers the key concept of the field of distribution management and distribution operations planning. The Components Of Distribution Management will be viewed from managerial perspectives impacting physical distribution. In addition, this course will provide students with the necessary confidence and skill to undertake and successfully manage distribution Requirements Planning in any industry or organization. The students will gain the knowledge how to meet consumer demands through planning, control and implementation of effective movement of goods to the destination.	
5. Pre-requirements for this course (if any): <b>Transportation Management</b>	
6. Co- requirements for this course (if any): None	
7. Course Main Objective(s) <ul style="list-style-type: none"> <li>The purpose of this course is to provide detailed knowledge and understanding of distribution management and how to designing channel networks for goods movement. In addition, provide the key distribution concepts, theories, and gaining knowledge on issues affecting the movement of goods. Particular emphasis will be placed on freight movements, distribution operations planning, distribution operations execution, intermodal distribution, distribution policy and costing and pricing.</li> </ul>
