The course in histology aims to provide the medical students with the appropriate knowledge and understanding of the normal microscopic structure of cells, primary tissues and organ systems enabling them to correlate the normal structure to their functions. This knowledge is also basic for the understanding of abnormal.

This course helps the students to learn other courses which depend on this basic knowledge with better and clearer understanding (e.g. Physiology, Biochemistry and Histopathology).

The course is designed in two semesters of 15 weeks each, and it has 4 credit hours. Student's assessment is done by one quiz in each semester as well as by mid year and final exam..
