

### **Message from the Dean**

It is our mission to promote the highest standards in medical education, health care, and research and community health services. For achieving this we need to ensure that our faculty develop and maintain their skills the areas of medical education, health care and related research. For this purpose we have envisaged a strong and continuous faculty development program. Our faculty development committee aims in all-round development of all faculty using a participatory approach. I hope in sha Allah, that in time the quality of our faculty will compare favorably with the best medical schools in the world.

Message from the vice dean for academic affairs and chairman of the faculty development committee

We have adopted a curriculum which is competency based. We hope our students will in sha Allah will develop all these relevant competencies – like being proficient as a scholar, medical expert, manager, communicator, collaborator, health advocate and professional. To achieve these competencies in our student we hope to develop our faculty to be role-models. Our faculty development committee in sha Allah will play an important role in ensuring that our faculty are up to date with the latest advances in all aspects of medical education .

### **Dr. Waleed Albu-Ali**

Dean of the College  
College of Medicine  
King Faisal University, Al-Ahsa
