

Vision

Excellence in Mathematical education and scientific research and their applications, and enhancing community engagement.

Mission

Providing advanced academic Mathematics programs in agreement with international standards that meet the labor market requirements, and conducting outstanding scientific research that contributes in the community services, preparing qualified and competent graduates who are capable of carrying out their duties in an attractive and stimulating environment.

Objectives

1. Excellence in teaching Mathematics and its applications.
2. Contribution in distinguished research in Mathematics.
3. Continuous development of human resources.
4. Ongoing development of recent technology in the field of Mathematics.
5. Enhancing community engagement that leads to mutual enrichment.
